PAINT LOK 555

Iron Phosphate

PRODUCT DESCRIPTION: Paint Lok 555 is a liquid iron phosphate formulated for use in spray washers where the cleaning stage is separate from the phosphate stage. It contains a blend of highly effective biodegradable surfactants that will effectively remove soils, oils, and other contaminants while simultaneously depositing a high quality iron phosphate coating. Paint Lok 555 contains an ingredient that keeps sludge and scale build-up off the inside and outside of the risers and washer interior. This enables you to operate over an extended period of time without purging or descaling your washer. The nozzles stay cleaner longer and require less attention than with most conventional iron phosphate products.

PROPERTIES:

Appearance: Clear Liquid
Density: 9.4 lbs/gal
pH Stability: Excellent

PRODUCT BENEFITS:

- Low Foaming
- Excellent Rinsability
- Phosphate only for 5+ stage washer
- Quality iron phosphate coating

USE PROCEDURE:

CONCENTRATION:	2% to 5%
TEMPERATURE:	100°F to 150°F
PROCESS METHOD:	Spray, pressure washer
CYCLE TIME:	Depends on application and coating weight desired

SAFETY: Contains Phosphoric Acid. Avoid contact with skin and eyes. DO NOT INGEST. When handling, wear rubber gloves, goggles and other appropriate equipment or clothing to avoid skin contact. Avoid contact with clothing. Should contact occur, flush skin with water; for eyes, flood with large amounts of water for 15 minutes and get medical attention. If ingestion occurs, DO NOT INDUCE VOMITING. Rinse mouth, drink water and get medical attention immediately. Read the Safety Data sheet before using. Use in well ventilated area. Do not mix with chlorinated products.
