# PROTECT-O-COTE OS

*Petroleum Based Corrosion Inhibitor*

**PRODUCT DESCRIPTION:** Protect-O-Cote OS has a solvent carrier which will evaporate off to deposit an amber, translucent, dry to the touch film. Protect-O-Cote OS leaves no messy film and will not bleed through wrappings, boxes, and most other packaging materials. It is generally used for protection of finished metal but can also be used to protect corroded metals from continuation of the corrosion reaction. The deposited film protects the metal surface from the extremes of high humidity, extreme temperatures, water mists and salt water sprays. Protect-O-Cote OS is used for outdoor storage of metal.

**PROPERTIES:**

Appearance: Amber Liquid  
Odor: Petroleum  
Density: 6.54 lbs/gal  
Flash Point: 100°F  
Film Thickness: 1.75 mils (dry)

**PRODUCT BENEFITS:**

- Non-Staining
- Thin film
- Lubrication properties
- Passes 1000 hour salt spray per ASTM B-117
- Passes 200 days in humidity cabinet per ASTM 1748

**USE PROCEDURE:**

CONCENTRATION:	Full Strength
TEMPERATURE:	Ambient
PROCESS METHOD:	Spray, dip and wipe applications
DRYING METHODS:	Air dry, spin dry, low temp oven, forced heated air

**SAFETY:** Do Not Ingest. Product may be harmful if swallowed. Use with adequate ventilation. Gloves and splash goggles should be worn when handling product. For full safety and first aid information consult SDS on this product prior to use.
